HIBISCUS

The South's Most Exotic Flowering Shrubs

*Fine Ornamental
Plants for the South*

1950-1951

**JACKSONVILLE
LANDSCAPE CO.**

1325 CASSAT AVENUE
JACKSONVILLE 5, FLORIDA

Phone: 2-3212

Azaleas

These gorgeous flowering shrubs make our southern gardens a riot of color from December to April. They are planted in the smallest plots and on large estates where their immense masses of bloom create such pictures that visitors come thousands of miles to see them. From central Florida to Norfolk, Virginia, and along the Gulf Coast west to Texas, Azaleas are the glory of the South.

Terms and Conditions of Sale

Location. Our Office and Nursery are located at 1325 Cassat Avenue, Jacksonville, Florida.

Cash must accompany all orders for immediate delivery or shipment, unless other arrangements have been made in advance. On reserve orders booked in advance of the shipping season, 25 percent down payment will be required, with the balance due when the shipping season opens. Orders are accepted only upon condition that they shall be void should injury befall the stock before shipment from any causes not under our control. Stock retained at our nurseries long enough to grow to a larger grade will be billed accordingly at shipping time.

How to Send Money. An Express Money Order, Postal Money Order, or Bank Draft is the best form of remittance. You can send your personal check if you desire. It is not safe to send silver or bills except in a registered letter.

Shipments. Please state when ordering how you wish shipment made—by Parcel Post, Express, or Freight. Lacking this information, we will use our best judgment as to method of forwarding. **On orders for shipment add 10 percent to the list price to cover packing charges.**

Shipping and Planting Season. From the middle of November to March for bare-rooted plants. Pot-grown and Balled and Burlapped plants at any time.

Guarantee. We guarantee our stock to be in first-class condition for growing when it leaves our hands. Every effort is used to have all our stock true to name. Nevertheless, it is understood that should any stock prove unsatisfactory or untrue to name, we shall be liable only for the sum originally paid for the stock and shall in no case be liable for any greater amount. The order should be examined carefully upon its receipt **and if not entirely satisfactory a report given us immediately.** We do not guarantee any nursery stock to live, except with the understanding that it will be replaced during the following planting season, at not less than 50 percent of the original purchase price, should any plants die within 90 days from transplanting from causes other than neglect.

Claims. If any errors should occur, they will be promptly rectified if claims are made within 10 days after receipt of stock. Our responsibility, except as stated above, ceases upon delivery of nursery stock to carrier.

All prices are f.o.b. Jacksonville, Florida, except when otherwise specified.

AZALEAS

These popular evergreen shrubs can be used in almost any location where other dwarf evergreens can be planted. Transplanting may be safely done at any time of the year. Their cultural needs are few, provided certain fundamental requirements are met.

Plant at the same depth as in the nursery. Planting too deep is certain to result in failure. The soil must be rich in humus and of the proper acidity. Do not cultivate too deep.

We will be glad to furnish you with a booklet dealing with the planting, care and cultivation of Azaleas and Camellias. It is yours for the asking.

We are in position to supply you with unusually fine plants this season—young, properly pruned, well grown in every way and as you notice, most reasonably priced.

Please do not confuse our Azaleas with thinly grown plants, which may have the height but are not well branched and do not have the proper vitality. Our plants have been spaced, grown under irrigation and have had the necessary care.

AZALEA INDICA

LAVENDER

Concinna. Midseason. Strong grower with medium-sized, rosy lavender flowers.

Formosa. The most popular of all Azaleas. Vigorous grower with large, lavender flowers. Very hardy.

Omurasaki. Midseason. More spreading than Formosa, with rose-lavender flowers.

Violacea Rubra. Late. Deep violet flowers with wavy petals.

AZALEA INDICA, continued

LIGHT PINK AND ROSE-PINK

Brilliant. Early to midseason. Clear rose-pink. Low, compact growth.

Elegans. Midseason. Upright grower with light pink flowers. One of the best.

Elegans Superba (Pride of Mobile). Midseason to late. Compact, bushy grower with rose-pink flowers borne in large clusters.

George Franc. Early. Large, rose-pink flower with deep red throat. Low, bushy grower. Very fine.

Macrantha Pink. Very late. Attractive glossy foliage and medium-sized, clear pink blooms.

ORANGE-RED

Dixie. Late. Strong grower with orange-salmon blooms.

President Clay. Early. Strong, upright grower with medium-sized, orange-red flowers. Very popular.

Prince of Orange. Late. Low, spreading grower with deep orange flowers.

To get the best results, use the best fertilizer money can buy. That is why we use and recommend only:

Reliance Azalea and Camellia Special Fertilizer

For your convenience we keep a stock of this fertilizer on hand at all times.

100-lb. bags.....	\$4 75
50-lb. bags.....	2 75
25-lb. bags.....	1 60
10-lb. bags.....	90
5-lb. bags.....	55

Always insist on factory-bagged material.

On orders for shipment please add 10 percent to the list price to cover packing charges, except on Hemerocallis.

Azalea indica elegans superba

AZALEA INDICA, continued

SALMON

Duc de Rohan. Early. Light salmon. Low, spreading growth.

Duke of Wellington. Beautiful midseason variety with rosy salmon flowers. Low, compact grower.

Lawsal (Daphne Pink). Midseason to late. Strong, upright grower with clear salmon flower.

Pride of Summerville. Early to midseason. Flowers almost identical to Lawsal, but of low, spreading habit of growth.

VARIEGATED

George Lindley Taber. Beautiful new sport from Omurasaki. Strong grower with soft lavender and white flowers. Fine with deeper shades.

Lady Edith. Midseason. Compact grower with attractive two-tone rose-lavender flowers.

WHITE

Fielder's White. The most satisfactory white Azalea. Pure white flower with attractive, deep green foliage.

Strong Bushy Plants	Each	10

This material is ideal for the preparation of Azalea beds. No waste; no weeds.

Standard burlapped bales (110 lbs.) \$4.95 each, f.o.b. Jacksonville, Fla.

On orders for shipment please add 10 percent to the list price to cover packing charges, except on Hemerocallis.

Azalea, Fielder's White

Salmon Beauty

Snow

AZALEA KURUME

These plants are slower growing than the Indicas, although they can stand more cold. They are usually smaller and of more compact habit of growth. Flowers are small but are borne in great profusion. Kurume Azaleas are most satisfactory if planted in a protected, partially shaded place.

ORANGE

Flame. Strong, upright grower with orange-red blooms.

PINK

Cherry Blossom. Early. Double; light pink shading deeper at center.

Coral Bells. Probably the most popular Kurume Azalea, with dainty soft pink, hose-in-hose flowers. Compact.

Hiawatha. Early. Single clear pink. Upright grower.

Mauve Beauty. Spreading variety with soft pink-lavender blooms. Very attractive.

Peach Blow. Single flowers with peach-blossom shadings. Fast, tall grower.

Pink Pearl. Early. Beautiful double flowers of salmon-pink. Very bushy grower.

Single Cherry. Two-tone white-pink flowers. Attractive.

RED

Christmas Cheer. Early. Bright red, hose-in-hose flowers. Small foliage. Upright grower.

Hexe. Late. Large, double red flowers. Slow grower. One of the best.

Hinodegiri. Brilliant scarlet flowers. Very hardy. Most attractive.

SALMON

Bridesmaid. Attractive bright salmon flowers. Bushy, compact grower.

Salmon Beauty. Free-blooming midseason variety with attractive soft salmon-colored flowers. Double.

Salmon Prince. Same color as Salmon Beauty but with single blooms.

WHITE

Snow. Midseason. The best of the white varieties. Very fine.

Strong Bushy Plants	Each	10
8 to 10 in., B&B.....	\$1 10	\$10 00
10 to 12 in., B&B.....	1 50	14 00
12 to 15 in., B&B.....	1 80	17 00

18 to 24 in., B&B.....	3 25	

NEW and RARE AZALEAS

JUDGE SOLOMON. A new sport from Formosa discovered by Bloomingdale Nurseries. Beautiful clear pink flower without any trace of magenta. Same habit of growth and hardiness as the parent plant.

Each
12 to 18 in., B&B. \$2 00

Not more than two plants to a customer.

CHINA SEAS. This fine variety of the Pericat group literally stole the Jacksonville Camellia Show last winter. Of very bushy habit of growth, it is covered with double, clear pink flowers. Long blooming period. Plant in partial shade for best results.

Each
8 to 12 in., B&B. \$1 50

FLORIDA. A cross between Omurasaki and Elegans, combining the best features of both plants. Very strong grower of more or less spreading habit, producing an abundance of large, clear pink flowers in midseason.

Very scarce. Each
8 to 12 in., B&B. \$1 50
12 to 18 in., B&B. 2 50

Not more than one plant to a customer.

HIBISCUS

You can bring the beauty and glamor of the tropics to your garden by planting Hibiscus. Inexpensive and easy to grow, these remarkable plants will add new beauty to your garden, which you may not have thought possible before.

Hibiscus blooms almost continuously from early spring to fall, producing an unbelievable number of

Hibiscus, Flamingo Plume

HIBISCUS, continued

flowers per plant. You may choose varieties with dainty flowers only 2 inches across or types with gigantic blossoms of 8 or 9 inches. Your preference may be for single, semi-double or double varieties in colors from the purest silvery white to the deepest maroon-red, yellows or shades of orange with all intermediate pastel tints and combinations of colors.

Hibiscus blooms are excellent for cutting, some will last as long as twelve hours, and, believe it or not, they do not have to be kept in water to remain fresh.

Being tropical in origin, Hibiscus are somewhat tender, but you can grow them in your southern garden if these rules are followed:

Plant in well-drained soil only, in a sunny, protected location.

Do not fertilize during late summer or fall.

Protect during cold weather.

Hibiscus plants are such vigorous growers that even if injured by cold, they are ready to produce their gorgeous tropical flowers again within a few weeks. If your climatic or soil conditions are such that they cannot be planted in the open ground, they may be grown in containers that can be moved to a protected location during cold weather.

Our Hibiscus may be transplanted at any time. Just slip the container from around the roots and set out the plant in its permanent location. No cutting back is necessary and no time is lost, so you may enjoy these tropical gems without delay.

Hibiscus, Mrs. Johnson

HIBISCUS, continued

Any of the following

	Each
5-qt. can	\$1 25
3-gal. can	3 00

Dark-Eyed Grandiflora. Bushy, upright grower. Small, light pink flowers with deep throat.

PYRACANTHA FORMOSANA

HYDRANGEA, a Colorful and Showy Hardy Shrub

HIBISCUS

Single Scarlet

A Beautiful Jacksonville Garden

Although yours may be a very simple garden, correct planning, the use of plants suitable to your conditions plus after care, will change the grounds to your home from just another yard to an outstanding place of beauty.

NAGAMI KUMQUATS

BOUGAINVILLEA, Crimson Lake

Ophiopogon Jaburan

ORNAMENTAL GRASSES and GROUND COVERS

Centipede Grass. A splendid lawn grass of Chinese origin. Very drought resistant. Propagation from stolons only. *Write us for free pamphlet.* \$2.00 per bushel.

Blue Stem St. Augustine Grass. A strain from the common St. Augustine Grass but much more satisfactory. Probably the leading lawn grass in the lower South today. Coarse in texture, it makes an excellent thick carpet. \$2.50 per bushel.

Cortaderia argentea (Pampas Grass). Beautiful clumps of ornamental grass with large plumes of white flowers.

Each

Small clumps \$1 00

Medium clumps 1 50

Large clumps 2 00

Liriope graminifolia densiflora (Big Blue Liriope). Wide, dark green, grass-like leaves with dense spikes of lavender flowers followed by black berries. Splendid for borders or ground cover.

L. spicata (Creeping Liriope). Much narrower leaves and smaller flowers than *Liriope graminifolia densiflora*. Fine for ground cover. Will stand any amount of shade.

Above two:

Each

Small clumps \$0 15

Medium clumps 25

Large clumps 35

Ophiopogon japonicus (Dwarf Lily-Turf). Very narrow, dark, grass-like leaves. Splendid for border or ground cover. Shade loving. Divisions, \$5.00 per 100.

O. Jaburan (White Lily-Turf). Long, grass-like leaves approximately $\frac{1}{2}$ inch broad, green and white variegated. White flowers. Very ornamental for boxes or containers.

Each

5-qt. can, strong clumps \$1 00

Hedera canariensis. (See page 15)

HEMEROCALLIS

Some fifteen years ago we became interested in Day-lilies. In those days very few outstanding commercial varieties were available, but even so, they proved to us that Hemerocallis were the ideal perennials for southern conditions. Since that time hundreds of new varieties have been created, and today Hemerocallis are among the most popular perennials in America.

In checking over our records for a period of years, we find that every season our sales of Hemerocallis have increased. Flower lovers in every part of the country have become interested in these plants, and today we have Daylily customers in almost every State in the Union and two foreign countries. Certainly there must be a good reason for this ever-increasing popularity.

Imagine plants that will grow and thrive with a minimum of care, in either sun or partial shade, that are not subject to plant pests and diseases and therefore require no spraying, that will grow in dry or moist soil and are satisfactory from Florida to Maine! They are ideal in the annual or perennial border with a background of higher shrubs, in dull spots in foundation plantings, in the cutting garden or for naturalizing. They are the busy gardener's answer to a prayer for more color.

We do not attempt to list all the varieties on the market today. For that matter, we do not believe that anyone offers all of them. However, by continually

HEMEROCALLIS, continued

testing promising new varieties, we are always adding to our list and at the same time eliminating those types that prove to be not at home under our climatic conditions.

Daylilies in the South may be transplanted at any time. Doing the job during late summer or fall assures you, however, that the plants will become well established before winter and give maximum results the first blooming season. Planting should be at the same depth the plants grew in the nursery. A liberal amount of humus or similar decayed vegetable matter added to the soil is advisable. Two applications of a high-grade commercial fertilizer during the growing season will keep the plants in vigorous condition. Never try to push them too much. Keep well watered until thoroughly established during hot, dry periods. For best results planting should be in sunny or at least partially sunny locations.

We are able this year to add 20 new varieties to our list, giving you an even more complete selection to choose from. Hemerocallis range in color from canary-yellow to the deepest velvety red, from copper shades to salmon, solid colors and bicolors; some varieties have eye zones. They range in size from Watkins' Jack 'n Jill with tiny flowers borne on 12-inch stalks to Wheeler's Ruby Supreme with gigantic flowers borne on stalks 4 feet tall.

As stock becomes more plentiful we are reducing the prices of the different varieties. Some, of course, are still very rare and others very slow to multiply.

If you are not already a Daylily enthusiast, may we suggest that you try just one plant, of any variety you may select. We feel certain that very shortly you will join the ranks of those thousands of enthusiastic gardeners who count Hemerocallis among their favorite flowers.

Our plants are guaranteed to be healthy, true to name and to reach you in good condition. Please return any damaged plants to us immediately and we will send you fresh stock if available or refund the purchase price. At no time, however, will our liability exceed the amount of the original purchase.

Each order is freshly dug, and we take special care to send you strong plants.

Acceptance of orders subject to prior sale.

Daylily orders of \$4.00 or more are shipped prepaid; otherwise please add 35c to cover cost of packing and transportation.

BICOLORS

BAGDAD. (Stout.) A fine large, bicolored flower with clear orange throat. Outer petals coppery red with orange background. Medium grower. Midseason. 50c each.

BICOLOR. (Stout.) Orange-yellow sepals with royal-red petals. Very beautiful. \$1.50 each.

CABALLERO. (Stout.) Striking bicolor with vermilion petals and golden yellow sepals and throat. Flowers to 6 inches across. Very fine and unusual. Evergreen. \$1.50 each.

HEMEROCALLIS, continued

ETHEL FOOTE. (Shoemaker.) One of our seedlings. Large flower with clear yellow throat; petals deepen to chocolate-brown with yellow stripe extending through center of petal. Plant in partial shade for best results. Unusual. Midseason. \$1.25 each.

FESTIVAL. (Stout.) Vigorous grower with English red petals and orange mid-stripe. A truly beautiful mid-season variety. \$1.00 each.

DEEP YELLOW

AMARYLLIS. (Betscher.) A very beautiful evergreen variety with vase-shaped, golden yellow flowers. Midseason. 40c each.

AUREOLE. Full, wide-spreading flowers of rich cadmium-yellow. Evergreen. Does not fade. Early. 40c each.

FLORHAM. (Harrington.) One of the old favorites with very attractive, clear yellow flowers. Very fragrant. Evergreen. Midseason. 30c each.

GYPSY. Small, cup-shaped, yellow flower with crinkly petals. The true variety is rare. Midseason. 40c each.

J. A. CRAWFORD. (Betscher). Wide-open flowers of clear yellow. Very strong grower. Floriferous. 50c each.

LUTEOLA MAJOR. (Van Tubergen.) Tall growing, with large, lemon-chrome flowers. Very desirable for cutting. Midseason. 40c each.

MONARCH. (Stout.) Well branched, with large, cadmium-yellow flowers. Midseason. Excellent. \$1.25 each.

OPHIR. (Farr.) Outstanding, tall-growing variety with wide, trumpet-shaped, clear orange-yellow flowers with a 6-inch spread. Long blooming season. Fragrant. Fine cut flower. Evergreen. 60c each.

SEMPERFLORENS. (Van Tubergen.) Vigorous grower with evergreen foliage. Medium-sized, cadmium-yellow flowers. 50c each.

SIR MICHAEL FOSTER. (Mueller.) A great favorite in every garden. Very strong grower, with tall spikes of trumpet-shaped, clear yellow flowers. Unsurpassed if tall background is desired. Should be in every collection. Fine cut flower. Evergreen. Midseason. 60c each.

SOUDAN. (Stout.) The medium-sized flowers with wide, overlapping petals are borne in great abundance. Color is clear golden yellow. Evergreen. Most desirable. Early to midseason. 80c each.

THE GEM. (Betscher.) This midseason variety has an attractive orange-yellow bloom of medium size. Its long flowering season makes it a worthwhile addition to any garden. 40c each.

YELDRIN. (Stout.) Small, yellow-orange flowers. Much-branched scapes. Very floriferous. \$1.00 each.

EYE ZONES

BUCKEYE. Very similar to Mikado but much earlier flowering. Clear orange with mahogany-red eye. Flowers borne in clusters. 75c each.

CRESSIDA. (Betscher.) A strong-growing, deciduous variety with large, orange blooms. A fulvous marking in the throat makes this a great favorite. Excellent for mass effect. 40c each.

HEMEROCALLIS, continued

MIKADO. (Stout.) One of Dr. Stout's first creations and still one of the most outstanding. Flowers are clear orange, with mahogany-red eye zone. Blooms twice. Midseason. Evergreen. Should be in every garden. 50c each.

RAJAH. (Stout.) Flowers almost identical to Mrs. John J. Tigert. Blooms about three weeks later. Evergreen. Midseason. \$1.00 each.

ZOUAVE. (Stout.) Fulvous red petals with dark marking in mid-zone. Throat clear yellow. Medium-sized flowers borne in great numbers. Early to midseason. \$1 00 each.

LIGHT YELLOW

CIRCE. (Stout.) Small, full flowers borne on strong scapes. Prolific bloomer. 65c each.

DAUNTLESS. (Stout.) Large, broad-petaled flowers of pale yellow, slightly flushed in the mid-zone; green-tinted throat. Beautiful. 75c each.

MANDARIN. (Farr.) Robust, large-flowering variety with pale yellow blooms of great beauty. Midseason. 60c each.

MODESTY. (Betscher.) One of the best pale yellows. Should be planted in partial shade for best results. Midseason. 35c each.

MRS. W. H. WYMAN. (Betscher.) One of the best. Pale glistening yellow. Very free flowering. 50c each.

PRINCESS. (Stout.) Large, delicate, fragrant flowers of clear lemon-yellow color. Strong grower. Midseason. \$1.00 each.

SONNY. (Stout.) Palest canary-yellow with greenish throat. Very heavy texture. July to August. \$2.00 each.

TARUGA. (Stout.) Beautiful open flower with faint cinnamon dust effect in the mid-zone. Gracefully curved flowers. \$1.50 each.

HEMEROCALLIS, continued

ORANGE

AJAX. (Mueller.) Usually the first Daylily to bloom in the spring. Medium clear orange flower. 60c each.

AUGUST ORANGE. Much branched. Rich deep orange flowers. \$2.00 each.

AURANTIACA. One of the fulvous types, with narrow petals. Throat of flower is orange and sepals are tinged with English red. Midseason. 35c each.

CINNABAR. (Stout.) One of the older midseason hybrids. The throat of the flower is clear yellow, with the color of the outer petals deepening to a lovely shade of brownish red. Color similar to Aurantiaca but more pronounced. Very floriferous. Evergreen. 50c each.

EARLY GOLD. (Shoemaker.) One of our seedlings with medium-sized, clear orange flowers borne in clusters. This variety flowers three or four times every season and will stand any amount of hot weather. 50c each.

EMILY HUME. (Hume.) Excellent under Florida conditions. Petals orange-yellow, decidedly pinched at the tips. Very attractive. 75c each.

HIAWATHA. (Stout.) Small flowers of clear orange, carried on strong scapes in great abundance. Very effective. Early to midseason. \$1.00 each.

MAJESTIC. (Stout.) Very large, clear orange flower of heavy texture. Beautiful. \$1.50 each.

ORANGEMAN. One of the best clear orange varieties. Usually has a few flowers during the entire growing season. Fine for mass plantings. Strong grower. Evergreen. 25c each.

TRIUMPH. (Stout.) A strong grower with large, rich orange-colored flowers. Faint fulvous red halo on throat. Very fine. Midseason. \$1.00 each.

VESTA. (Stout.) Flowers are very broad petaled, deep orange in color, with slight fulvous marking and of good substance. One of the best. Evergreen. Midseason. 50c each.

WOODLOT GOLD. (Cleveland.) Large, fragrant flowers of brilliant orange-yellow. Fluted petals with long blooming season. 35c each.

PASTEL TINTS

CAMELOT. (Bright Taylor.) Very beautiful flower of cinnamon-orange color. Both sepals and petals slightly recurved. Good texture. \$3.00 each.

FLORIDA. (Hayward.) Small flower of light chrome-yellow and old-rose-blush. Unusual. 75c each.

HALO. (Wheeler.) A medium-sized, yellow flower with a cinnamon-colored halo. Very strong grower. \$2.50 each.

HAZEL SAWYER. (Wheeler.) A medium-sized flower of dusty pink with yellow throat. Very floriferous. \$2.50 each.

LINDA. (Stout.) A bicolor with pastel-shaded eye zone of great beauty. Golden yellow base with cinnamon marking. Midseason. \$1.00 each.

Daylily orders of \$4.00 or more are shipped prepaid; otherwise please add 35c to cover cost of packing and transportation.

HEMEROCALLIS, continued

MARY GRACE. (Shoemaker.) A very showy, fast-growing type. Flower is star shaped, with throat of a delicate shade of green and outer part of petals and sepals deepening to pale apricot. The entire flower has a decided silvery sheen, making this one of the loveliest Daylilies we know. Midseason to late. 65c each.

WAU-BUN. Early to midseason variety with light cadmium-colored flowers, over which there is a sprinkling of faint fulvous red. The twisted petals make this variety outstanding. \$1.25 each.

PEACH and BUFF SHADES

AFTERGLOW. (Stout.) Pale buff and pastel peach with rosy midvein in the petals. Free flowering. \$1.50 each.

B. H. FARR. (Stout.) Large, full flower of glowing rosy peach color with darker rose in the veins. Very attractive. \$1.50 each.

GEORGIA. (Stout.) A truly peach-colored flower with deeper tinted throat. Full blooms with wide, overlapping petals. Not available until Fall, 1951.

SHADES OF RED

BARONET. (Stout.) Fulvous red flower of great merit borne in great profusion. Two midseason blooming periods. Fine for low border. 75c each.

BLANCHE HOOKER. (Stout.) Vigorous grower with large, maroon flowers borne on tall scapes. One of the best. \$2.50 each.

DUNCAN. (Wheeler.) Very early. Gorgeous deep red. Large flower up to 6 inches across. \$2.50 each.

FANTASIA. (Stout.) Most unusual flower of oxblood-red and canary-yellow. Petals are twisted and fluted. \$1.50 each.

GUNGA DIN. (Bright Taylor.) A 5-inch, star-shaped flower of red-purple with sulphur-yellow throat. Stands full sun. \$3.00 each.

MICHAEL ROBINSON. (Russell.) Rich mahogany-red of velvety texture, shading to gold in the throat. Large flower. Recurrent. \$2.50 each.

PORT. (Stout.) Small, bright red flowers carried in great profusion. Fine for contrast in low border. Midseason. \$1.00 each.

RED BIRD. (Stout.) One of our favorite red Daylilies. Strong grower. Tall scapes. \$1.75 each.

RUBY SUPREME. (Wheeler.) Probably the most outstanding ruby-red variety. Produces an unbelievable number of large flowers per plant. Truly a collector's item. \$3.00 each.

SACHEM. (Stout.) Medium-sized flower with wide, overlapping petals. Deep velvety red with yellow-green throat. Holds color well in hot weather. One of the best. \$1.25 each.

TEJAS. (Russell.) Most unusual orange-red with yellow throat. Although semi-deciduous, this much-branched variety is highly recommended. \$1.00 each.

THERON. (Stout.) Medium-sized flower of oxblood-red with clear yellow throat; petals pinched. July flowering. \$1.50 each.

HEMEROCALLIS, continued

VULCAN. (Stout.) Beautiful, medium-large flower with orange throat and maroon-colored petals. Robust grower. Evergreen. Early to midseason. \$1.00 each.

WOLOF. Velvety maroon with clear orange throat. Tall. \$1.50 each.

MIXED HYBRIDS

Splendid for Naturalizing

We have a nice supply of mixed hybrids developed by Mr. R. Wheeler and other well-known hybridizers. In most cases they equal the named varieties but are not different enough to warrant introduction.

HYBRID DAYLILIES IN MIXED COLORS. 10 for \$3.50, 20 for \$6.50, 50 for \$15.00.

NOTE: In classifying the various varieties as "Early" "Midseason" or "Late" flowering, we are guided by North Florida conditions as indicated below. Seasons may vary greatly, depending upon local weather conditions. During periods of heavy rainfall, plants will frequently produce additional out-of-season flowers.

EARLY—March 15 to May 1.

MIDSEASON—May 1 to July 1.

LATE—July 1 to August 15.

HEMEROCALLIS, continued

Watkins Introductions

**Created in the South for the South
by Prof. John V. Watkins of the University of Florida**

In spite of the heavy demand for the 1949 introductions of this well-known hybridizer, we were able to build up a large enough stock to enable us to reduce the price of these lovely varieties. **Order yours today before the supply is exhausted.**

1949 Introductions

ALLAPATAH. The flowers, produced in mid-April, are large ($5\frac{3}{4}$ inches across), of full form and heavy texture. The color approaches mascara 7-L-8* and the effect is self-colored, since there is little differentiation between the perianth segments of the eye zones. The garden effect might approach deep maroon. \$2.50 each, postpaid.

JACK 'N JILL. Habit dwarf, excellent for edging Daylily borders. The blooms of the evergreen clone are borne early in April; those of the deciduous one follow about five weeks later, giving a continuous sequence of bloom over a period of about three months. The flowers are small ($3\frac{1}{4}$ inches), of a sprightly red which approaches Burmese ruby, 7-H-6*, self-colored, since there is little differentiation between the flower parts. Texture and substance are excellent and the color holds well during typical springtime weather in northern Florida. These seedlings have shorter scapes, smaller blooms and flower weeks earlier than commercial varieties with which they have been grown for comparison. Jack 'n Jill are to be sold in pairs only, so that they may be planted together as edging plants for spring-long garden effect. Per pair only, \$2.50, postpaid.

TAMIAMI. Plant very robust. The flower is large (14.5 cm.), spreading, giving a bold day-long garden effect, for it does not roll or fade badly in the April sun. The sepal is self-colored, Pompeian red, 4-J-10*, and there is no differentiation of margin or mid-rib. The sepal is slightly recurved. The petal, also of self-colored Pompeian red, 4-J-10, has veining but slightly darker. The petal is very slightly recurved, if at all. \$2.50 each, postpaid.

* "A Dictionary of Color," Maerz and Paul.

Other Watkins Hybrids previously released:

KANAPAHA. Evergreen. Clear cardinal-red blooms without eye zone. \$2.50 each.

MRS. JOHN J. TIGERT. Pale orange throat with red petals. Very strong grower of great merit. Deciduous. Midseason. \$1.00 each.

WELAKA. Very large flowers with orange-colored throat, fading to a rosy fulvous tone on outer segments. Excellent. \$1.00 each.

SPECIAL COLLECTION OFFER

**All 7 Watkins introductions,
one of each for \$11.00, postpaid**

Daylily orders of \$4.00 or more are shipped prepaid; otherwise please add 35c to cover cost of packing and transportation.

FLOWERING SHRUBS, HEDGE PLANTS AND PALMS

The entire South has many shrubs that supply color from spring to fall, but Florida and the Gulf Coast regions are especially blessed in the large number of varieties that thrive in this territory. Many that are only moderately successful a few hundred miles north grow and bloom freely in the Lower South. From the different varieties here noted you will be able to select flowering shrubs that will give color nearly every month in the year. If you are not certain about the selection, tell us your general location and we shall be glad to assist you in making a suitable choice of shrubs for year-round color.

ABELIA grandiflora (Glossy Abelia). An attractive shrub with small shiny foliage. Produces an abundance of pinkish white flowers from May to September. Fine for hedges and foundation planting.

4 to 5 ft., B&B.....	4 50
5 to 6 ft., B&B.....	6 50

RAPHIOLEPIS indica (Indian Hawthorn). Spreading, slow-growing evergreen shrub with dark green foliage and flat clusters of pinkish white flowers followed by black berries.

R. japonica (Japanese Hawthorn). Like the preceding but a much faster grower and upright. Both varieties are splendid for seaside planting.

Above two:	Each
12 to 18 in., B&B.....	\$1 85
18 to 24 in., B&B.....	2 50
2 to 3 ft., B&B.....	3 75

SABAL palmetto (Cabbage Palm.) Tall growing, with a large head of fan-shaped leaves. \$1.25 per ft., of clear trunk. 10 ft. \$12.50, 15 ft. \$18.75.

SEVERINIA buxifolia (Boxorange). Low-growing, spiny shrub. Excellent for hedges. Stands shearing well. White flowers followed by black berries.

	Each
8 to 12 in., B&B.....	\$1 00
12 to 18 in., B&B.....	1 50
18 to 24 in., B&B.....	2 25

FLOWERING SHRUBS, HEDGE PLANTS AND PALMS, continued

SPIRAEA, Double Cantoniensis (Double Bridal-wreath). Splendid variety with graceful, arching branches. Very free flowering, with umbels of pure white double flowers in early spring.

	Each
12 to 18 in., B&B.	\$1 25
18 to 24 in., B&B.	1 70
2 to 3 ft., B&B.	2 25

VIBURNUM odoratissimum (Sweet Viburnum). Fast-growing evergreen shrub with very fragrant white flowers in early spring.

	Each
12 to 18 in., B&B.	\$1 50
18 to 24 in., B&B.	2 50
2 to 3 ft., B&B.	3 25
3 to 4 ft., B&B.	4 00

V. suspensum (Sandankwa Viburnum): Slow growing, of spreading habit. Attractive white flowers.

	Each
Qt. can.	\$0 50

ZAMIA integrifolia (Coontie). Low-growing cycad with palm-like leaves. Splendid for shady location.

	Each
Strong bulbs.	\$1 25
Extra-strong bulbs.	2 00

PEAT HUMUS

Our light sandy soils are badly in need of having both their humus content and moisture-holding capacity built up. That is why we suggest you use *Peat Humus* in preparing your planting beds.

Ton (2½ to 3 cu. yds.)	\$18 00
½ton.	9 50
¼ton.	5 00

We carry a supply at all times.

Spiraea, Double Cantoniensis
